

BILAL ABOUZID

Software Engineer / *AZURE CERTIFIED*

 /bilal-abouzid  /bilal-auz

 <https://bilal-auz-dev.netlify.app>

 +212 69 426 6361  imBilalAbouzid@gmail.com

A Software Engineer with a primary focus on **backend development**, but comfortable working on both **backend** and **frontend** technologies. Recognized for **quick learning**, **flexibility** and **adaptation**.

PROFESSIONAL EXPERIENCE

Software Developer (Freelance) 2022 - present

- **Develop** web/mobile apps for diverse clients (individuals, businesses, organizations).
- Provide ongoing **maintenance** and add new **features** to the apps
- Translate the client's **specifications** into functional apps.
- Provide **cloud hosting** and **deployment** solutions.

Software Engineer Intern 2021 | OMNISHORE Groupe MEDTECH Casablanca, Morocco

- Eliciting the requirements of the client and transforming them into technical diagrams using **UML**.
- Applying **Design Patterns** to the class diagram and making it **Scalable** and **flexible** to meet future changes.
- Developing the **RESTful** backend using **Laravel**, **MySQL** and **MongoDB**, and building a demo **frontend** with **bootstrap** library.
- Communicating and Reporting to the mentor throughout all project phases.
- Contributing to the project's technical documentation.

SKILLS: HTML . CSS . NodeJs . ExpressJs . ReactJS . Tailwind . SQL . Azure . Docker . GIT

PERSONAL PROJECTS

-Bug Watch: Bug Tracker- NodeJS, React, ExpressJS, MongoDB, TailwindCSS Dec 2023

- Bug Watch is a Bug Tracker for your GitHub Repositories. Track your Bugs and Features using your GitHub account. It is a full-stack project powered by GitHub API.

-Statify: Spotify Tracker- React, TailwindCSS, Recharts.JS, Spotify API Oct 2023

- Empowering Spotify users to explore their music journey with personalized listening stats and activity tracking. It utilizes Spotify's API and OAuth 2.0 authentication mechanism to ensure a secure login for users.

-Inventory Management Mobile App- NodeJS, ExpressJS, React Native, MongoDB July 2023

- A freelance full-stack native mobile app in response to a client's request for a customized management app for their business, transforming their requirements into a mobile application.

-Travel Guide Provider- Laravel, MySQL, MongoDB, Bootstrap (library) Jan 2022

- As the developer, I focused on a robust backend that integrates external APIs for real-time travel data, delivering users summarised information about their next travel destination.
