Dedicated junior software engineer with a passion for the backend and a solid understanding of the frontend. I have hands-on experience using various tools and frameworks and proof of work that includes personal projects and an internship and GitHub contributions. Recognized for quick learning, flexibility and adaptation.

PROFESSIONAL EXPERIENCE

Software Engineering Intern Jun 2021 - Aug 2021

OMNISHORE Groupe MEDTECH Casablanca, Morocco

- Eliciting the requirements of the client and transforming them into technical diagrams using **UML**.
- Applying **Design Patterns** to the class diagram and making it **Scalable** and **flexible** to meet future changes.
- Developing the **RESTful** backend using **Laravel**, **MySQL** and **MongoDB**, and building a demo frontend with **bootstrap** library.
- Communicating and Reporting to the mentor throughout all project phases.
- Contributing to the project's technical documentation.

SKILLS: HTML . CSS . NodeJs . ExpressJs . ReactJS . SQL . MongoDB. GraphQL . Tailwind . GIT

PERSONAL PROJECTS

-DaSummary- React, MonogDB, Tailwind

- A frontend project showcases the effective utilization of various RESTful APIs, including OpenWeather, Twitter, and Spotify, to aggregate and summarize diverse data into a single location.

-Inventory Management Mobile App- NodeJS, React Native, MongoDB, NativeBase (library)

- A freelance full-stack native mobile app in response to a client's request for a customized management app for their business, transforming their requirements into a fully functional application.

-Travel Guide Provider- Laravel, MySQL, MongoDB, Bootstrap (library)

- As the developer, I focused on a robust backend that integrates external APIs for real-time travel data. The website empowers users with comprehensive information through seamless search, highlighting my backend and data integration skills.

-Online Blog- NodeJS, ExpressJS, MongoDB, Bootstrap (library)

- The project aims to implement the core backend features, such as user **authentication** (login and register), along with blog management capabilities (add, edit, delete). The frontend, is built with **Bootstrap** that seamlessly interacts with the backend.

EDUCATION

Master of Science, Computer Engineering 2022 - 2024(expected)

CIU - Cyprus International University

Bachelor of Science, Computer Engineering 2019 - 2022

PIIMT - Private International Institute of Management & Technology

LANGUAGES

Arabic: Native

English: Proficient

Bosnian: Beginner
