+212 69 426 6361 imBilalAbouzid@gmail.com

Dedicated junior software engineer with a passion for the backend and a solid understanding of the frontend. I have hands-on experience using various tools and frameworks and proof of work that includes personal projects and an internship and GitHub contributions. Recognized for **quick learning**, **flexibility** and **adaptation**.

PROFESSIONAL EXPERIENCE

Software Engineering Intern **Jun 2021 - Aug 2021**
OMNISHORE Groupe MEDTECH *Casablanca, Morocco*

- Eliciting the requirements of the client and transforming them into technical diagrams using **UML**.
- Applying **Design Patterns** to the class diagram and making it **Scalable** and **flexible** to meet future changes.
- Developing the **RESTful** backend using **Laravel**, **MySQL** and **MongoDB**, and building a demo frontend with **bootstrap** library.
- Communicating and Reporting to the mentor throughout all project phases.
- Contributing to the project's technical documentation.

SKILLS: HTML . CSS . NodeJs . ExpressJs . ReactJS . Tailwind . SQL . MongoDB. GraphQL . GIT

PERSONAL PROJECTS

-Statify: Spotify Tracker- *React, TailwindCSS, Recharts.JS, Spotify API*

- Empowering Spotify users to explore their music journey with personalized listening stats and activity tracking. It utilizes Spotify's OAuth 2.0 authentication mechanism to ensure a secure login for users.

-DaSummary- *React, MonogDB, Tailwind*

- A frontend project showcases the effective utilization of various RESTful APIs, including OpenWeather, Twitter, and Spotify, to aggregate and summarize diverse data into a single location.

-Inventory Management Mobile App- *NodeJS, React Native, MongoDB, NativeBase* *(library)*

- A freelance full-stack native mobile app in response to a client's request for a customized management app for their business, transforming their requirements into a fully functional application.

-Travel Guide Provider- *Laravel, MySQL, MongoDB, Boostrap* *(library)*

- As the developer, I focused on a robust backend that integrates external APIs for real-time travel data. The website empowers users with comprehensive information through seamless search, highlighting my backend and data integration skills.

EDUCATION

Master of Science, Computer Engineering 2022 - 2024(expected)
CIU - Cyprus International University

Bachelor of Science, Computer Engineering 2019 - 2022
PIIMT - Private International Institute of Management & Technology

LANGUAGES
Arabic: Native
English: Proficient
Bosnian: Beginner
